

WHAT CAN I DO?

BYOB. Bring Your Own Bags.

Use a reusable water bottle.

Install a rain barrel(s).

Stop regular use of pesticides.
Seek organic remedies first.

Use NATIVE plants in your yard.

Buy organic, locally produced food.

Limit your use of disposables.

Use LED light bulbs. Recycle them when their long life is complete.

Divert food scraps to an outdoor open bottom bin. Compost!

Take shorter showers (and turn off the water while you suds up).

Use cold water for everyday loads of laundry. It's just as effective!

Use a smart thermostat.

Assure your home has current recommended levels of insulation.

Assure your home has a tight air seal, especially to the attic and basement via a blower test.

Recycle throughout the house, not just in the kitchen.

Expand your recycling beyond the basics. Research at www.Earth911.org

Use low flow faucets, toilet tanks and showerheads.

Use deep rooted rain garden plants where water collects in your yard.

Use vinegar instead of harmful chemical cleaners in your home.

Unplug appliances that are not in regular use.

Eat less meat.

Resolve to fix things.

Divest from fossil fuels.
